Re: City of Selah Capital Improvement Projects Update

The City of Selah's Wastewater Collection System Improvements Project is nearing the end of completion. This letter is to notify you of the extension of the road closure at Jim Clements & E. Naches Avenue. **For the safety of the traveling public, the road closure will extend through Friday, October 7th 2022.**

The reason for the road closure extension is due to unmarked and unforeseen utilities such as fiber, gas, and additional conduits uncovered during the initial construction period. To accommodate for these obstructions, the contractor must take extra caution while digging around those utilities within the 15-foot deep trench. Additionally, the location of a planned manhole requires an adjustment which includes the bypass pumping of the existing sewer line. These additional steps are time consuming, but are necessary to ensure the project's completion.

The coned turn lanes on E. Fremont Avenue are in place to accommodate the large trucks making the turn around the corner.

The current detour route shall remain in place during construction.

Public Works would like to thank everyone for their continued patience and understanding during this road closure.

If you have questions regarding the project above feel free to call Public Works at (509)-698-7365.

Thank you,

Matthew Taylor, Engineering Technician
